

## South Carolina Health Disparities: Mean Age-adjusted Stroke Mortality Rates\* 1999-2001

\*Age Adjustment Uses 2000 Standard Population  
Source: DHEC Biostatistics

ETSSD, Bureau of Epidemiology, SC DHEC (March 2003)

- During 1999-2001 blacks in all SC health districts experienced higher rates of stroke mortality than did their white counterparts.
- The black:white relative risk was greatest in Waccamaw (1.54) and Appalachian II Health Districts (1.48), and least in Appalachian I Health District (1.13).
